

EINS offers a wide assortment of Centrifugal Cast Steel Pumps SH-CCSP, which is of top quality and caters to the specific requirements. EINS centrifugal pump castings are made of excellent quality cast steel raw material including alloy steels and others which stands high water pressures.

EINS designs and fabricate technically superior pump impellers that are known for efficient flow impelling for varied processing requirements in diverse industries. EINS pump impellers have specifically designed impeller blades, which offer least resistance to the fluid flow. Additionally EINS pump impellers are split constructed hub designed to make it easy to be installed.
